

EMSCULPT® PATIENT FACT SHEET

BUILD MUSCLE & BURN FAT

BRING YOUR BOOTY BACK

EMSCULPT brings a completely **new approach to body shaping category**. It is the first and only non-invasive body sculpting procedure for men and women that **simultaneously addresses both muscle and fat**. EMSCULPT also creates the world's **first non-invasive butt lift procedure**.

ARE YOU THE RIGHT CANDIDATE FOR EMSCULPT?

- 1 Spending long hours at the gym trying to tighten and tone your muscles without any desirable effect?
- 2 Not a suitable candidate for other body shaping solutions?
- 3 Looking for a non-invasive improvement of your buttocks?

If you answered “**yes**” to at least one of these questions, you can benefit from the EMSCULPT procedure. It is the first device of its kind, CE-marked and backed by clinical studies.

HOW DOES EMSCULPT WORK?

EMSCULPT creates a unique electromagnetic field that penetrates the skin to impact muscle tissue as well as belly fat. The energy induces almost 20,000 supramaximal muscle contractions per session, something that can't be achieved at the gym. All this happens while you are lying on a bed during treatment.

THE BENEFITS OF EMSCULPT

- It builds and **strengthens your muscles** and **burns your belly fat** without the time-consuming struggle of exercise.
- It is the world's only non-invasive procedure **to efficiently lift, fill and firm your buttocks**.
- It can improve **strength, muscle tone and firmness in your arms and calves**.
- A comfortable non-invasive procedure with **no recovery time, no anesthesia and no needles** required.
- Depending on the treated area, the standard procedure is just **four 20 or 30-minute treatments** over a two-week period.
- You may begin to feel improvement right after the treatment, and it may even continue improving for several weeks following the treatments.

- Scientific research shows that **96% of treated patients were satisfied** with the treatment results for abdominal body shaping.*
- **Patients reported a significant improvement in their level of confidence** after the treatments.*
- Tested by professionals and with average consistent results of a **16% increase in muscle mass and 19% reduction in fat**.*

PATIENT TESTIMONIALS

#1 Patient testimonial Daj

"I hate squats, so I would do them so infrequently and not consistently that I wasn't really getting any results.. With the EMSculpt you actually feel intense muscle contraction and you know that something is going on... I was like "wow, this is really really working!"

#2 Patient testimonial Barbora

"I always wanted stronger and toned arms, but I never had the right motivation to workout. Nothing really worked until I found the EMSculpt. The session is great, it's like an intensive workout with no effort. I know it sounds unbelievable. My arms are much stronger with pronounced contours which I always wished for. I've finally found my best personal trainer."

#3 Patient testimonial Marc

"Having a procedure like EMSculpt, there is no prep, there is no downtime, there is now after.. it's beautiful that way.. I feel much more confident, much better about myself - my own self-image."

#4 Patient testimonial James

"Just 20 minutes in four sessions made a bigger difference on my calves than the last few years of trying to get them stronger and firmer, I didn't believe it, but now I know, that anything is possible with the EMSculpt."

WHO STANDS BEHIND EMSculpt?
